

The Jimmy Jib camera crane is a modular crane made up of 3ft aluminum sections with the smallest size being 6ft going up to 40ft. The Jimmy Jib can be mounted on a studio ped, special jib track, 3/4 wheel base or tracking vehicles. The Jib head can also be over slung adding 3ft height, giving a 360 degree view. The Jimmy Jib will run on mains power or batteries. Full spares, electronics and head are carried at all times.

Track is available.
